 - Financial Services Technology
-

PROFESSIONAL EXPERIENCE

Consultant – Information Technology

Juvias Place | October 2020 – Present

Lead technology strategy, architecture, automation, integrations, analytics, and vendor management. Drive modernization initiatives and business process transformation.

Key Achievements

- Created agents for Juvias place to interact with internal Postgres SQL database to fetch data as required by senior management with simple prompts, using function tools.
- Created Agent to fetch order status using an API call to 3rd party API “Easy Post”
- Automated several other workflows to send email if inventory in systems goes below Threshold levels.

- Integrated third-party systems like “Ship Station”, “NetSuite” and “Business Central” through APIs to streamline business operations.
- Coordinated with cross-functional teams and external vendors to ensure seamless business operations.

Technologies: Open AI, LLM, C#, WPF, Prism, JavaScript, Business Central, Power BI, Cloud Technologies

Associate Vice President

JP Morgan Services India Pvt. Ltd. | March 2017 – October 2020

Led delivery and architecture initiatives for fixed-income trading platforms, workflows, and enterprise integrations.

Key Contributions

- Developed and enhanced front-office trading applications supporting electronic and manual trade booking.
- Designed trading workflows, blotters, and ticketing systems using WPF, Prism, and MVVM.
- Contributed to TIBCO Stream Base integration for real-time data processing.
- Handled strategic enhancements like svn to git migration along with CI/CD configuration on Teamcity.
- Participated in architecture discussions and platform enhancements for strategic trading systems.
- Implemented automated testing frameworks using NUnit.

Technologies: C#, WPF, Prism, MVVM, TIBCO, Linux

Associate / Team Lead

Nomura Services India Pvt. Ltd. | January 2010 – March 2017

Worked on multiple strategic trading and framework initiatives within Global Markets Technology.

Key Achievements

- Led development of trading blotters, ticketing systems, and workflow applications for Rates and Fixed Income businesses.
- Built reusable WPF frameworks and controls used across multiple business applications.
- Designed highly extensible UI components using Prism, MEF, and MVVM patterns.
- Managed a team of developers and coordinated requirement gathering, design reviews, demonstrations, and delivery activities.

Technologies: C#, WPF, Prism, MVVM, MEF, DevExpress

Senior Software Engineer

Open Solutions | November 2008 – January 2010

Developed and supported enterprise banking and credit union solutions used by clients across North America.

- Delivered enhancements and client-specific customizations.
- Worked directly with customer support teams to analyse requirements and provide technical solutions.
- Supported large-scale banking applications.

Technologies: C#, .NET, WinForms

Earlier Career Highlights

Sapient Corporation (2008)

Developed Staffing Automation web application using ASP.NET and C#.

Lehman Brothers (2006 – 2008)

Developed middleware and reusable framework components for Fixed Income trading systems including web service integration modules and advanced grid frameworks.

Kring Technologies – Intel Client (2005 – 2006)

Developed enterprise connectivity solutions supporting wireless, LAN, WAN, and mobile network integrations.

Meritech Solutions – NEC Client (2004 – 2005)

Built telecom network optimization and wireless simulation applications utilizing GIS and mapping technologies.

Media Online Inc. (2003 – 2004)

Maintained and enhanced multiple commercial web platforms.

EDUCATION

Bachelor of Engineering (Computer Science)
Maharshi Dayanand University, Rohtak
2001

Class XII – CBSE, New Delhi
1997

SELECTED CAREER HIGHLIGHTS

- 24+ years of software development and architecture experience.
- Delivered enterprise solutions for global organizations including JP Morgan, Nomura, Lehman Brothers.
- AI-Enabled Automation
- Stakeholder & Vendor Management
- Extensive expertise in C#, WPF, Prism, MVVM, and Microsoft technology stack.
- Designed reusable frameworks and enterprise UI platforms.
- Strong experience in Capital Markets, Fixed Income Trading, Telecommunications, and E-Commerce domains.
- Proven track record of technical leadership, team management, and solution delivery.
